

ABHISHEK BAIRWA

Data Science Intern | Python | Machine Learning | SQL | Deep Learning
+91-9216137595 | mr.abhi1149@gmail.com | [LinkedIn](#) | [GitHub](#) | [HackerRank](#) | Jaipur, Rajasthan, India

PROFESSIONAL SUMMARY

Motivated and detail-oriented Data Science student (B.Tech CSE, 3rd Year) with hands-on internship experience at Regex Software. Skilled in Python, SQL, Machine Learning, and Deep Learning with practical exposure to the complete data science pipeline — from data cleaning and feature engineering to model building and deployment. Holds a 4-Star SQL rating on HackerRank. Passionate about solving real-world problems through data-driven approaches.

WORK EXPERIENCE

Data Science Intern — Regex Software, Jaipur, India

2024 – Present | On-site

- Worked on end-to-end data science workflows covering data collection, cleaning, EDA, feature engineering, and model evaluation across multiple real-world datasets.
- Applied feature engineering techniques including Label Encoding, Ordinal Encoding, OneHot Encoding, and ColumnTransformer using Scikit-learn Pipelines.
- Built and evaluated supervised ML models including Linear Regression, Logistic Regression, Decision Tree, Random Forest, SVM, and Naive Bayes.
- Explored ensemble learning techniques — Bagging, Boosting, and Voting Classifiers — to improve model performance.
- Implemented unsupervised learning methods including K-Means Clustering, PCA for dimensionality reduction, and Apriori for association rules.
- Gained hands-on experience with Deep Learning (ANN, CNN, RNN, LSTM) and NLP techniques including tokenization, word embeddings, and transformer workflows.
- Maintained and versioned code repositories using Git and GitHub following collaborative development best practices.

EDUCATION

B.Tech in Computer Science Engineering

Compucom Institute of Technology, Jaipur, Rajasthan

Expected Graduation: 2027 | CGPA: 7.5

- Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Statistics, Machine Learning, Computer Networks, OOP.

TECHNICAL SKILLS

Programming Languages: Python, SQL (4★ HackerRank), C (Basic)

ML & Data Libraries: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn

Machine Learning: Linear & Logistic Regression, Decision Tree, Random Forest, SVM, Naive Bayes, K-Means, PCA, Ensemble Methods (Bagging, Boosting)

Deep Learning & NLP: ANN, CNN, RNN, LSTM, GRU, Word2Vec, TF-IDF, Transformers, LangChain

Data Skills: EDA, Feature Engineering, Encoding, Normalization, Standardization, Pipelines, Data Visualization

Tools & Platforms: Jupyter Notebook, Google Colab, MySQL, Git, GitHub, FastAPI, Docker, AWS (EC2, Lambda, SageMaker), Excel

PROJECTS

Exploratory Data Analysis — Multi-Dataset Study

Python, Pandas, NumPy, Matplotlib, Seaborn

- Performed EDA on 4–5 diverse real-world datasets covering domains such as supply chain, sales, product reviews, and employee data.
- Analyzed distributions, missing values, outliers, and correlations to uncover actionable patterns and business insights.
- Created rich visualizations including heatmaps, pair plots, bar charts, and time-series graphs to communicate findings effectively.
- Documented insights in clean, well-structured Jupyter Notebooks for review and presentation.

Feature Engineering — Applied on Multiple Datasets

Python, Scikit-learn, Pandas, ColumnTransformer, Pipelines

- Applied end-to-end feature engineering on multiple datasets with varied structures including numerical, categorical, and mixed-type features.
- Used encoding techniques — Label Encoding, Ordinal Encoding, OneHot Encoding, and `get_dummies` — to convert categorical variables for ML models.
- Implemented Scikit-learn Pipelines with `ColumnTransformer` and `FunctionTransformer` to automate and standardize preprocessing workflows.
- Applied normalization and standardization techniques to handle skewed distributions and improve model convergence.

Supply Chain Analysis

Python, Pandas, Seaborn, Matplotlib

- Analyzed supply chain data to identify bottlenecks, delivery delays, and product performance trends across categories.
- Performed data cleaning, aggregation, and groupby analysis to extract region-wise and product-wise insights.
- Visualized KPIs and trends using bar plots, line charts, and heatmaps to support supply chain decision-making.

ACHIEVEMENTS & COMPETITIVE CODING

★ **HackerRank SQL — 4 Stars** [View Profile →](#)

Solved advanced SQL challenges covering joins, subqueries, aggregations, window functions, and stored procedures on HackerRank.

SOFT SKILLS

Analytical Thinking • Problem Solving • Team Collaboration • Quick Learner • Attention to Detail • Communication
