PROFESSIONAL SUMMARY

Software engineer with 2 years of experience building scalable backend services and REST APIs. Skilled in Python, Java, and distributed systems, with a strong focus on clean architecture and test coverage.

SKILLS

Python | Java | Spring Boot | REST APIs | PostgreSQL | Docker | Kubernetes | AWS | Git | CI/CD

EXPERIENCE

Software Development Engineer — Nimbus Cloud Systems

Bengaluru, India | Jul 2024 – Present

- Designed and shipped 6 microservices handling 1.2M daily requests, reducing average latency by 28%.
- Migrated legacy monolith billing module to a containerized service, cutting deployment time from 40 to 6 minutes.
- Mentored 2 interns on API design standards and code review practices.

Backend Engineer Intern — Velocity Labs

Pune, India | Jan 2024 – Jun 2024

- Built internal admin dashboard using Django and React, used daily by 40+ staff.
- Wrote unit and integration tests increasing backend coverage from 51% to 84%.

PROJECTS

DistribuQueue – Lightweight Distributed Task Queue

Open-source task queue in Go supporting priority scheduling and at-least-once delivery; 300+ GitHub stars.

EDUCATION

B.Tech in Computer Science and Engineering

Manipal Institute of Technology | 2020 – 2024

CERTIFICATIONS

AWS Certified Developer – Associate | Oracle Certified Professional: Java SE 11
