PROFESSIONAL SUMMARY

Data scientist with 2.5 years of experience building predictive models and ML pipelines for fintech and retail clients. Strong foundation in statistical modeling, feature engineering, and deploying models to production.

SKILLS

Python | SQL | Scikit-learn | XGBoost | Pandas | TensorFlow | MLflow | Docker | Tableau | A/B Testing

EXPERIENCE

Data Scientist — FinEdge Analytics

Hyderabad, India | Mar 2024 – Present

- Built a credit risk scoring model improving default prediction AUC from 0.78 to 0.86.
- Deployed model as a containerized REST API serving 50K+ scoring requests per day.
- Designed feature store pipeline reducing model retraining time from 2 days to 5 hours.

Data Analyst — Bazaar Retail Technologies

Hyderabad, India | Dec 2021 – Feb 2024

- Built churn prediction model for 80,000+ customers, enabling targeted retention campaigns.
- Created Tableau dashboards tracking 15 KPIs across regional sales teams.

PROJECTS

Demand Forecasting Engine

Built ensemble forecasting model (XGBoost + Prophet) for SKU-level demand, reducing stockouts by 17%.

EDUCATION

M.Sc. in Data Science

IIIT Hyderabad | 2019 – 2021

B.Sc. in Statistics

Osmania University | 2016 – 2019

CERTIFICATIONS

TensorFlow Developer Certificate | AWS Certified Machine Learning – Specialty
